

# BIOLOGY CAPSTONE PROJECT IDEAS

- Abortion: Understanding Its Effects on Future Pregnancies
- Relation of Vaccines to Infant Autism
- Effects of Menstruation and Birth Control Pills on Health
- Developing Biological Weapons: Understanding the Power of Diseases
- The Link Between Obesity and Genetics
- Exploring Alternative Medicines and Their Effects
- A Study of Phobias and How to Deal with Them
- New Volumetric Datasets
- Volumetric Datasets Development
- Functional And Neuroanatomical Organization
- Cadaver Donation
- Variation Of Human Anatomical
- Ultrasound In Gross Anatomy Lab
- 3D Electron: Tomographic Reconstruction
- Evaluation And Development Of Educational Platform
- Simulations Of CHS
- Anatomical Educational Platform
- Type Of Genes Suffering From Obesity
- Abortions Effects On Future Pregnancies
- Genes That Responsible For Homosexuality
- Can Ebola Used As Biological Weapon
- Do Alternative Medicines Work?
- Autism And Vaccines Relationship
- Birth Control
- What Could Cause Cancer
- Mystery Of Meningitis
- Advantages And Disadvantages Of Nanotechnology
- Causes Of Phobias

- Obesity And Organotins Relationship
- Analysis On Epidemiological
- Association Between Thombotic Events And Thrombotic Mutation
- Cognitive Benefits: Possible Mechanisms
- Plant Spacing And Size Effects
- Native Vegetation
- Best Hemoglobin Based On Transfusion Protocol And Oxygen Carrier
- Immunological And Preparation Characterization Of The Formaldehyde
- ASFV De-Capping Activity
- Translational And Transcriptional Analysis Of Psipten
- Invasive Plant Species Effects
- Gnrha: Direct Treatment
- Caudal Skeletal Anatomy: Comparative Study
- Life History Strategies Comparative Analysis
- Interaction Between Soil Invertebrates And Alliaripetiolata Examination
- Neuroanatomy And Its Functional Organization
