

# IT CAPSTONE PROJECT TITLES

- Cyber security: Attacking and Defending Companies
- Gaming Simulation for Financial Services
- WebCAT or Web-based Crime Analysis Toolkit
- Debt Collection Search Mechanism
- Uniform Crime Report Data Spatial Analysis System
- Automated Analysis and Modeling for Call Centers
- Automated Hotel Booking for Delayed Flights
- Storage and Analysis for Medical Research Data
- Evaluating Program for Unstructured Data Mining
- Automated Cargo Deployment
- Computer And Network Security Challenges
- Intelligent System For Making Business Decisions
- Web Based Training System
- Recovery Plans For IT Emergency
- Recognition System For Voice Or Text
- Software Systems For Stock Management
- Object Recognition System
- Record And Document Management Software
- Software Quality And Testing
- Global Age Information Technology
- Principles Of Cyber Security
- Cyber Security: Defend And Attack
- Java Programming Advanced Techniques
- Electronic Record And Document Management
- Documentation, Quality Assurance And Software Testing
- Human Interactions: NLP
- Help Of Intelligent Systems
- Mobile Learning And Mobile Application
- Computer Recognition And Vision

- Complicated Games: Game Technology
- Importance Of File: Network Security
- Simulations And Forecasting Of Business
- Data Mining: Its Effectiveness
- Terms And Conditions Of Commercialization Projects
- Difficulty Of Human Computer Interface
- Information Systems Economic Model
- Geo-BIS
- Information Logistics And Data Mining
- Data Warehousing
- BIS Language Technology
- Growth Of The IT: Digital Convergence Implications
- Supply Chains And ERP
- Managing Information Infrastructure
- Information Technology Rapid Changes
- Knowledge Management
- Technical Needs Of Clients
- IT Helps An D Benefits
- Intelligent Software: What It Can Give To Business
- Helps Of Information Technology For Employees
- Using IT For Website
